Fullstack Developer

Software developer with +7 years of expertise in designing, building, and maintaining microservices, web, and desktop applications using Microsoft technologies such as **.NET Framework**, **.NET Core**, **C#**, **VB**, **Razor**, and both **SOAP and RESTful** services. Proficient in working with **Entity Framework and MS SQL Server databases**. On the front end, I am experienced in utilizing **TypeScript and JavaScript** frameworks, particularly **Angular**. Additionally, possess a strong background in developing add-ons for leading ERPs, including SAP Business One and Odoo

Work Experience

Software Engineer as Consultant independent

Sep 2022 to date

- Led the development of resilient microservices for an informative mobile application within the business group Cainco Bolivia. The application enables users to discover and purchase services from other partners, view their accounts, and access invoices. It seamlessly integrates with external services for electronic invoices and enterprise software SAP B1.
- Developed web administration modules to efficiently manage content for the mobile application, oversee user and role administration, implement notification systems, and handle data files, inventory, and sales.

Main Technologies: .Net Core 6, C#, Rabbit MQ, PostgreSQL, and Mongo Db Databases, Angular 14, Angular CLI version 10.2.0. bootstrap 4.

Full-stack developer at Whiz - Innovalon

Jan. 2022 – Aug. 2022

- Collaborated in the maintenance and development of new functionalities for the Health and Pharmacy application of the ScriptMed Cloud System. Successfully resolved 100% of assigned bugs and actively contributed to the development of microservices and the user interface of the custom prescription module.

Main Technologies: C#, .Net Core 3.2, SQL Server, Oracle, Cache Redis, Kafka, AureliaJS, Angular 13, bootstrap.

Software Developer at Exxis Group

Apr 2019 to Dec 2021

- Successfully extended contract management functionality to the construction module of SAP Business One. Implemented functionality that allowed for changes to contract terms and conditions, including item quantity adjustments, cost revisions, and project completion time updates.
- Contributed to the development of the financing module, streamlining customer credit eligibility assessments and automating the calculation of payment terms and interest rates.

Main Technologies: SAP SDK based on .net framework C# - VB, SQL Server, and Hana databases.

Software Developer at ASFI - APS Bolivia*Jul 2016 to Mar 2019*

- Developed a mobile app focused on publishing events and training within the financial sector.
- Designed and implemented ETL data loading processes, extracting flat file information from regulated entities and populating the market with pension and insurance data.
- Created OLAP cubes and dynamic reports tailored to the pension industry, providing valuable insights and data visualization capabilities.

Main Technologies: Ionic Framework, Angular 4, Microsoft SQL Server- Integration Services, Analysis Services, and Reporting Services..

Fullstack Developer at YPFB Bolivia*Jun 2012 to Jun 2016*

- Led the development of a comprehensive construction project management system encompassing various integrated modules, including item management, project registration, supplier management, contracts, project tracking, modifications, and payroll generation. The system was designed and architected specifically for the oil and gas sector.
